DETAILED ACTION

This is a response to the Applicant's amendment submitted on 09/11/2006. In virtue of this amendment, claim 14 is canceled; and thus, claims 1-13 are now presented in the instant application.

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

This Examiner's Amendment is made to update the continuing data based on the information provided by Applicants. It includes:

In the specification, page 1, between the "title" and "Field of the art", insert:

--This Application is a National Phase Application under 35 U.S.C. 371 claiming the benefit of PCT/JP03/01992 filed on 02/24/2003, which has priority based on Japan Application No. 2002-64165 filed on 03/08/2002.--

Terminal Disclaimer

2. The terminal disclaimer filed on March 29, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application Number 10/504,979 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

3. Claims 1-13 are allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

In addition to the terminal disclaimer filed on March 29, 2006, prior art fails to disclose or fairly suggest a transmission secondary electron emitter which emits secondary electrons generated by the incidence of primary electrons comprising a voltage applying means for applying a predetermined voltage between the surfaces of the incidence and the emission of the secondary electron emitting layer, wherein the voltage applying means includes a first electrode formed on the side of the surface of the incidence and a second electrode formed on the side of the surface of the emission for applying the predetermined voltage to form an electric field in the secondary electron emitting layer for accelerating the secondary electrons in the direction to the surface of the emission, in combination with the remaining claimed limitations as called for in independent claim 1 (claims 2-13 are allowed since they are dependent on claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
